Software Company Expands With Powerful Business Technology

ZEDEDA

UNRIVALED IT SERVICE

Status Pros helps businesses innovate, scale, and protect themselves with enterprise-grade IT frameworks at a cost that makes good sense. Founded on over 20 years of experience, we've worked with hundreds of executives to support lasting results.

CLOSING THE GAPS

ZEDEDA, a software company for edge computing, needed to outsource its IT operations. With F100 clients to support and strict GDPR requirements to meet, not just any MSP would do—**especially since the average fine for a GDPR violation is now over two million euros.** A specialized approach is what they required, and it's what Status Pros provided.

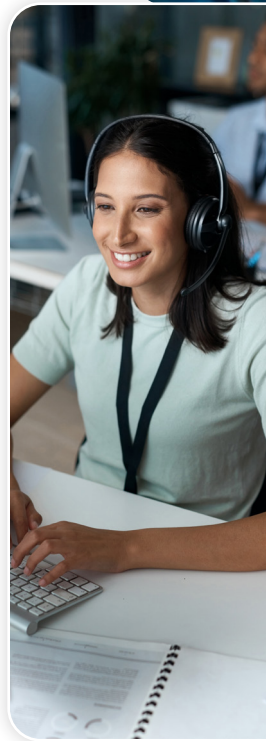

FLEXIBILITY FOR THE FUTURE

Status Pros provided SOC/SIEM services to ensure compliance and delivered in-depth cybersecurity solutions to protect the company's valued clients. With **the average cost of a breach reaching \$4.88 million in 2024**, according to IBM, this partnership was more crucial than ever. Additionally, the Status Pros team offered 24/7 in-person and remote support as part of a co-managed partnership designed to keep pace with the company's rapid expansion.

AN ONGOING PARTNERSHIP

Today, ZEDEDA benefits from **fast, always-available expertise and business growth that is not hindered by technology, but supported by it.** The Status Pros team remains a trusted partner, providing IT services that align with their budget and scale according to evolving needs.
